THE "EVENING WORLD" LECTURES.

The course of free lectures, which were ach a success last year, are again in progreas. This is one of the most beneficial hemes which the paper has ever originated. measure which combines amusement with intellectual growth and advantages for thousands of the most worthy citizens of the city is one that any paper, person or society could pride itself on procuring.

The best lecturers have been obtained for this year's course, and the subject of their discourses will be drawn from every field in which the human mind has exercised itself for the benefit of humanity. These lectures will be "popular" lectures-that is, the points to be explained will be set forth so that no technical education is required to gra p them clearly and fully.

The citizen rules the city and his intellect rules the citizen. What higher or nobler function of benevolence can exist, therefore, than that which strengthens and improves the reasoning powers of the human mind? THE EVENING WORLD feels that to secure such a benefit to worthy men and women is semething which is its own reward.

Make Home Always the Brightest,

To keep a husband at home evenings you would have to please him in every way. Never complain to him of being sick or not feeling well. Let him go out when he wishes. Never ask where he is going.

Give him plenty of flattery and lots of love and affection, a good meat when he comes home. Keep the house clean and inviting. Above all, always look neat and cheerful, and I am quite sure he will think there is.

"No Place Like Home."

She West Out with Him.

To the Educe .

My wife, though a New York girl, is in California. I beg, on her behalf, to give her recipe for "keeping me at home."

A month after marriage I returned to my bachelor habits. My official duties often occubachelor habits. My official duties often occu-pied me at night. I passed many leisure hours in these pursuits, until, between duty and pleasure. I became almost a stranger in my own

pleasure. I became almost a stranger in my own home.

Suddenly my wife resolved to share my pleasure trips. Whether on lishing or beating excarsions, equestran or hunting trips, my wife became my constant companion and helpmest in the work entailed by such pleasures.

Heturning fatigued from work or pleasure I always found my home invitingly cosy. Being ambitious to please me, my wife learned to discuss my favorite books, to play my favorite games, to make my pet b-yarages, &c.

Through constant companionship we were so closely drawn together that when separated from her I began to long for her company, until finally I would not stay longer from home than duty demanded. And thus it has been ever since.

Soon after that he joined a club and was away "upon important business" almost every evening. At last I thought over the best way to keep him home without heaping coals of fire upon his head.

This is what I did. Every Saturday night when he came home with his week's wages I prevailed upon him to give me his wages so I could save some of it for a rainy day, and when I got his wages we agreed that he was to have ten conts daily for car fare, two cents for bridge toils and fifteen cents for lunch, I to purchase his clothes for him.

My giving him twenty-seven cents each day, and no more, I found caused him to stay at home, as he had no money to spend when he went out evenings. The old-fashioned clothes food the cloth, "We are now a happy couple, contented and with money in the hank.

After dinner her husband, as usual, prepared to go out. She halted him, saying she had a surprise for him, and took him up to the room. He never left her alone evenings again.

This Is an Old Maid's Plan.

To the Editor : First, let a wife do all in her power to make a home pleasant and happy. Then, if her husband still continues to spend his evenings elsewhere (outside of strictly pre-sing business, which;the wife ought to know about), just let her get herself ready about five minutes after he has gone, and pay a visit to the same club or piace he has gone, and in-t say to him nicely: "As man and wife are one I did not think it sensible

Do this for several evenings, always returning form a few minutes later than your husband. You a few minutes later than your husband. You will have to do it but a few times before you will arouse his suspicion and cause him to stay at home to "keep his wife home in the evening."

John Must Have Common Sense to the Editor :

The way to keep a husband at home evenings is to make a home what it should be-the grandest and most charming place in existence. A man who has a good wife knows that it is his duty to honor and respect her, and that he should be at home evenings, be temperate, henorable and respectable; by his conduct brighten the life of the one who is dearer to him than all the world, and to gain the respect of the community by his devotion to his wife and home.

A man who has a good home, and who prefers a very foolish one; besides, no man can be kept in evenings no matter how good his wife or his home unless he is blessed with common sense.

Mrs. Laura Estenbrook.

Tompkinsville, S. I.

Dont He Too Painfully Neat.

To keep your husband at home in the evening make home pleasant for him. Be neatly dressed when he arrives and meet him with a smiling face. His first words may be little more than a growl, but never mind, he will appreciate your effort just the same and be unconsciously cheered and refreshed.

Serve the exening moal at once. Do not keep him waiting until he becomes cross and impatient, merely from hunger, not total depray-

Do not have the children about. Bed is the place for children in the evening, and often tired, crying children are "the last straw" to the weary husband who needs rest and quiet-

Have everything next and tidy, but remember Have overything nest and fidy, but remember that even neatness may be overdone. Should your lusband carelessly throw down hat and coar upon the nearest chair do not look daggers at him and nonnee down angrily upon them. Be as acreeable to him as you were before marriage. Let him smoke and lounge and do as he pleases occasionally.

In a word, makes home where love and comfort reign surreme, and the probabilities are that the dear fellow will be only too ready and anxious to stay in it.

Prof. De Bortkiewitch Breaks Away She Fled with One to Escape Forced Union with the Other.

> The Course of True Love Smoothed by Judges Power and Andrews.

Angry Parents Attempt to Lay Violent Hands on the Young Couple.

Nineteen-year-old Adolph Schwartz and Ernestina Lubeck, the pretty, black-eyed maiden of his choice, are having a hard time

of it. Tins lives with her parents and seven brothers and sisters, in a third-floor tenement at 326 East Houston street. Thursday afternoon Adolph called, and Tina "I will never go to Sing Sing," said Prof. Auselme Stunislaus de Bertkiewitch to his law-

packed up her clothing and left with him. He yer after he had been arraigned in the Tombs boards at 177 Ludlow street, and when Papa Lubeck, a painter, came home from work Mamma Lubeck told him that Adolph had forced her to let Tina go by the use of a revolver, and had forced Tina to accompany him against her will by the use of the same per-

sunsive eloquence. Lubeck engaged Lawyer Charles H. Smith, and he obtained a writ of habeas corpus from Justice Andrews, commanding Adolph to pro-

Then he returned to his ledgings to spruce up, but was interrupted by Officer Shiels, of Essex Market Court, with a warrant charging him with abduction.

An Evening Would reporter visited the Lubeck house, where Edward Lederbecker, a pale young man, explained that Tina was his betrothed, but that she didn't want to marry him, and he was going to enforce the contract. He showed the contract signed by himself and Ernestina.

showed the contract signed by himself and Ernestina.

This was also reen by the reporter. She said:

"All the troub e is that my folks made me sign that engagement to Lederbecker. I don't want him and I won't marry him. Adolph Schwartz was my first love, and I want him.

She accompanied the reporter to the Essex Market Court and there told berstory. She upset the pistol story by saying her mother told her she must get out of the house forever, and that if she would leave the "loolery "given her by Lederbecker she might go. So she went. She had not gone to Schwartz, but to a friend's house, and there had been no intimacy between her and her lover. She insisted that she was nearly eighteen instead of fifteen years as her father had stated.

"Why do you want to make her marry Lederbecker when she wants Schwartz?" demanded Justice Fower.

"Lecause he earns \$18 a week and Schwartz only \$10," promptly replied both father and mother.

mother.

As there was apparently no illegal or immoral purpose in the heart of Schwartz, Justice Power dismissed the complaint and all hands went into purpose in the heart of Schwartz, Justice Power dismissed the complaint and all hands went into the street.

Then Papa and Mamma Lubeck made a raid on their daugnter and her triumphant lover, and a riot cusued. They chased the young people across and across the street through the mud, and when Lawyer Smith tried to quiet them by telling that if they persisted they would get locked up, and informing them that Adolph must obey Justice Andrew's mandate and take Tins to the Supreme Court, he got his silk hat smashed over his cres for his pains.

The young neople hurried off down Grand street, the parents persuing, and the quartet, followed by a hosting, yelling crowd of street gamins, men and women, only escaped by rushing up the L station at the Bowery.

At Supreme Court Chambers, young Schwartz told Justice Andrews in a manly, straightforward way, how he happened to visit Tins, and that he had not restrained her, but that she had obtained work as a domestic with a Thirtieth street physician to begin Monday, Judge Andrews dismissed the writ, telling Tina she might go where she pleased.
